

# Make a Difference for a Child

You can help a child this October by having something custom framed. That's because a portion of every framing sale made during the month will be donated to The Starlight Children's Foundation, an international non-profit organization focused on improving the quality of life for seriously ill children and their families.

"National Art & Framing Month" is promoted by the Art & Framing Council and we participate to help the children involved with this foundation. And for every \$5,000 we raise, Starlight will donate a Nintendo Fun Center—a game machine that rolls up to the children's bedside—to the hospital of our choice. So when October arrives and there's something you want to have framed (for yourself or as a holiday gift), bring it in. It will help to make a child in our area feel a little better. ■

*Daisy Fuentes is the celebrity spokesperson for The Starlight Children's Foundation and National Art & Framing Month.*
