

# Framing Focus

## Vacation Memories

**P**hotos and souvenirs capture the moments you enjoyed while on a vacation. And while they may be one-dimensional, photos have the power to take you back to that special time and place. Once they're framed, you'll see them everyday and the people and places you visited will bring a smile to your face each time you look at them.

Some good "subjects" to have framed are people (whether they're your travelling companions or friends you made there), notable landmarks, or simply a beautiful scenic shot. Many times, landmarks and scenic shots make great wall decor once they are matted and framed. You can also use the negatives to enlarge a particularly good shot to a substantial size—one that can occupy a prominent place on your wall.

However, not all vacation memories are necessarily photos. How about the handmade Belgian lace you bought while in Europe or

*Why not showcase your favorite photos that may be "hidden" in an album by having them framed? We'll help you select the best ones for a unique grouping!*

the seashells gathered at your seashore getaway? Instead of storing them to look at on a rainy day, bring them in to be framed. We'll help you choose a great way to display them to create a fitting keepsake.

In addition to creating a dynamite way to display your memories, we also have the technical expertise to frame your items in a way that will preserve them for many years to come. There are certain issues to address including protection from fading and other environmental hazards, as well as preventing potentially harmful chemical reactions when working with metal, wood, or plastic mementos. So bring your vacation photos and souvenirs to us and we'll make them part of your everyday life. ■

*Elegantly framing your souvenirs and mementos can create a reminder of a pleasant journey.*
