

Stacked Moulding: A Creative Design Alternative

Stacking is the practice of combining two or more mouldings to create a single frame, adding dimension and distinction to frames. Stacking adds width and depth and combines styles and finish colors. Stacked moulding adds richness to any home décor that often can't be matched by a single moulding.

Stacked moulding can project art from the wall in a dramatic yet stylish fashion. Striking borders can also be created for any type of art. From traditional to

modern, moulding can be combined and stacked to present a elegant design for your art and home.

Ask us to show you different combinations of colors and finishes using variety of moulding styles, including flat, scoop, and reverse mouldings. You'll be amazed at the endless design possibilities presented by stacked moulding. Stop by our shop and let us design a stacked frame to your specifications that will turn an ordinary piece of art into a distinctive focal point for your home decor. ■
