## Frame Your Needlepoint

**H**andmade needlework often has sentimental value and should be framed for posterity. Think of all the hours this labor of love took the sewer and what pleasure you and they would have if it were preserved, framed, for all to see. There are many different ways to frame needlepoint, and we can show you unique designs with beautiful frame and matting options.

We will take great care of your needlepoint to ensure against damage. Even if you have an antique piece in brittle, poor condition, we can prepare it and preserve it in a beautiful frame design. Whether your needlepoint is antique or new, we can design a package that will preserve it and fit in perfectly with your home decor. ■
