

Framing Focus

SPECIALTY MATS ARE OUR SPECIALTY

Enhancing your artwork and creating a custom design that fits with your home décor is our specialty. One way to achieve a one-of-a-kind look for your art is by adding specialty mats to the frame design. There are many options, including decorative papers, French mats, gilded mats, and specially cut mats.

Using decorative papers on mats is one way to open up new design possibilities. With open grooves and fine, quality papers, artwork stands out against a rich background. Papers can pick up the colors and textures in the artwork, embellishing a lovely frame design. Paper panels add another decorative edge to artwork.

French mats are especially stylish for botanicals and antique prints. We will custom design these mats by choosing the right mixture and blend of colors and ink to match and balance the images.

Gilded mats add an upscale touch to art framed in traditional carved and gilded frames—or to gilded contemporary frames. Using gold and silver leaf on mats adds an exciting glow and creates a luxurious, elegant texture. Gilded mats are the perfect finishing touch to a rich frame design.

Lighter occasions may call for a more whimsical type of mat. We can design mats that have a theme, such as a sport, profession, or hobby. Special events like weddings, birthdays, and anniversaries can be commemorated with a custom-made mat surrounding a photo of the person. This is a personalized, special way to remember special people and days.

Our specialty is creating unique designs just for you. Whether it is a traditional or contemporary work of art, an antique map, a photograph, or your child's masterpiece, we can enhance any artwork with a custom, handmade specialty mat. ■

A hand-colored copper plate botanical engraving by Basil Bessler from 1613 is enhanced by a French detail mat.

This gilded mat works well with a traditional carved and gilded frame. Gilded mats also add an upscale touch to many other styles of frames.

Installation—At Your Service!

Providing in-home installation is one way we can provide you with special services. There are many options available for hanging artwork and photographs in both your home and business. Art will stay straight and level—we guarantee it.

We can provide different types of hanging methods for those special circumstances. Do you have artwork that needs to be hung on a curved wall or a wall made of stone? Do you have multiple pieces that need to hang parallel or in a straight line? We have the skill and the correct hardware to get the job done.

There is definitely more to hanging your valued artwork

than wire and a hook. Options include “double strap” systems that use two D-ring hangers on each side of the frame. This is also an excellent way to hang heavy mirrors. A cleat system is made of wood and always ensures that acrylic boxes or wood frames hang perfectly flat against a wall. “Z-channels” and “T-locks” consist of two interlocking pieces. Both systems offer extra security for a valuable piece of art and are also suggested for offices and institutions.

We will accurately measure and install your artwork as part of a full-service package. These methods will keep your artwork balanced and flat against the wall to ensure maximum security and professional presentation. ■
