

# Framing Focus

## SUPER SIZE IT!

**F**raming large collectibles is a challenge, but we always have the solution. There are many ways to frame oversized collectibles, including shadowboxes and unique display showcases. No matter what you may have to frame, we can create a design for you that will fit into your home or office décor.

A prominent display can be the focal point of any room. Memorabilia is often a ideal candidate for framing. Valuable autographed photographs along with other items—jerseys, footballs, baseball bats, tennis racquets, uniforms, flags—can be creatively framed using imaginative techniques. We will consider room size and how large a space the framed item should fill as well as the preservation requirements for the piece.

Signed letters, autographed photos, and even clothing can all be displayed in an interesting way. For instance, a signed letter from LBJ along with his Stetson hat make a fabulous presentation. Displayed in an acrylic box, all the items are preserved and protected from the environment. This makes quite an impressive piece for an office or corporate hallway.

Use your imagination as well. Anything and everything can be framed—even your child's old cast from a broken arm. Why not chronicle the event with explanatory captions plaques set below the casts? That is truly a one-of-kind custom made shadowbox that becomes a piece of family history.

We welcome your unique oversized items and are up for the challenge. Stop by our design counter and let us show you how your treasures can be designed to fit your decor and create memories to last a lifetime. ■

*The creatively designed acrylic showcase not only prominently displays the LBJ photograph and Stetson hat, it preserves it as well.*

*The shadowbox, contains four casts and caption plates along with two photos of the child.*
